## Profile

Hi , I'm Mehrshad, a **diligent frontend developer** with **+3 years** of experience building responsive, user-friendly websites and applications. I specialize in **Angular** and **React.js** and **next.js**, leveraging **modern web technologies** to create seamless and dynamic **user interfaces**. I have hands-on experience with **Progressive Web Applications** (**PWAs**) and **Enterprise Resource Planning** (**ERP**) systems, ensuring high-quality solutions tailored to client needs. Skilled in **API** integration and manipulation, I excel at developing **reactive and intuitive UIs** that enhance user engagement. **Fluent in English**, I'm committed to continuous learning and delivering exceptional results.

## Skills

### programming Languages

- javascript(ES15)
- typescript

### tools / technologies

- git
- github
- atlassian bitbucket
- atlassian jira
- jenkins
- figma

### familiarities

- Object Oriented Programming (OOP)
- Progressive Web Application (PWA)
- Enterprise Resource Planning (ERP)
- Microservice Architecture
- Clean Code
- CI/CD

### frameworks / libraries /markup language

- Angular
- angular material
- NgRx
- RxJs
- React.js
- Next.js
- material ui/mui
- React Query
- redux/redux toolkit
- jsx/tsx
- express.js
- css
- bootstrap
- tailwind
- html
- axios
- restful API
- APIs
- docker

### soft skills

- communication
- teamwork
- problem-solving
- discipline

## Professional Experience

**frontend developer** 09/2023 – 05/2024
*Dayan company* tehran, iran

I worked for Dayan company(Proset startup) as an angular developer,

- developing various project with complex logic
- creating reusable components to form an ERP webapp related to stone industry etc

helped me to improve my problem-solving skills and thinking outside the box.

## Projects

**realmehrshad.ir** 02/2025 – 03/2025
*my personal portfolio website.*

This website is created by next.js on top of typescript and featured by animations, slider, map, contact form and screen observing to give beautiful and user-friendly appearance to menu items; in addition this website is bilingual in English & Persian and also supports dark mode theme.

**Ideal todo project(test task)** 01/2025 – 01/2025
*practical cv project*

this project supposed to be a hiring test task that because of some connection problems and misinformation, I decided to complete it according to my personal taste to make it a rich-featured mini app as a portfolio.

features and utilities:

- managing and sharing data using useContext hook
- well-doing CRUD operations
- using DialogModal to get confirmation of deleting an item(todo)
- validating fields and items before and after submitting data
- notifying user about the process and status of todos using react-toastify library
- reactive filtering for done, undone and all of the todos

**weather app** 06/2023 – 06/2023
*practical cv project*

I learned how to:

- work with APIs
- make my website more reactive by changing the data and ui, when the user input changes and searches.

## Education

**Diploma in Experimental sience** 2015 – 2018
*Shahid Eftekhari highschool* Ahmad sar gorab, Iran

## Languages

**English** — advanced
